

Curtains/Carpets and Accessories

Jeckells curtain department also have a large range of fabrics to offer with different styles of pleating etc, these can be lined or unlined.

Scatter cushions and bolsters could possibly be made in curtain material or with a contrasting piping all complementing the upholstery making a more comfortable environment.

Our carpeting department can supply, template, cut and bind internal and cockpit carpet. Please call or ask one of our sales team for more advice.

Standard combination mattresses

Jeckells have developed the combi mattress which is made from basic 5" or 6" foam to British Fire Retardant standards. With interior coiled springs inserted into the foam enabling air to pass through, giving the feel of a sprung mattress. This has the advantage of being able to be made to any peculiar shape required for your boat. A polycotton topping over the springs, with a further layer of foam, with a heavy dacron covering, giving strength and extra comfort, being covered in a material of your choice.

Mattresses

There are three main types of mattress foam. Formations ranging from the firm 5", 4" foam. The blue firm foam, pink softer foam, a combination of chip foam and the soft or deluxe spring mattress tailored to clients needs. The foams are either covered in the same material as the rest of the boat or in a cotton twill breathable fabric. A ventair mesh is widely used to create an air pocket between the foam and berth boards.

Cockpit Upholstery

Cockpits are traditionally an uncomfortable area to sit in therefore we have worked hard to complement the style of the boat whilst achieving maximum comfort. Jeckells are constantly developing methods and changing ways to better the cockpit foams, and materials in working closely with the UK top suppliers. From a recovery and or refoaming service, to a complete overhaul we strive to always better the product. Materials used range from leathercloth to sunbrella canvases and a full range of outdoor materials. Ask for information.

Helmsman Seats

Jeckells mainly manufacture tailor made helmsman seats using either a plastic structure (no arms) or a wooden seat (with arms) foamed and covered to clients' individual requirements.

Jeckells helmsman seats are all individually designed and manufactured and can be made to special requirements to suit your needs. The majority of Jeckells helmsman seats are made using leather cloth but alternative fabrics can be used. Jeckells are also able to recover existing seats.
